## MAKING INVESTMENTS

· A trust company investing money is adviser and counselor as well as inventor, suiting individual investments to individual circumstances. With a perpetual existence: with its firm tone. The advance in sugar seems administration in the hands of a large number of officers and directors chosen especially for fitness; with vast financial responsibility-(the IN- low is weak. On Commission row the vol-DIANA TRUST COMPANY has a capital of \$1,000,000 and a liability of its stockholders of \$1,000,000, making changes. Peaches are not coming in very \$2,000,000 altogether)-no agency in modern life is at once so conservative and beneficent in the conduct of business affairs.

Stock speculation, Monday, was unsettled on a small volume of business, but the main tendency was in the direction of a lower range of values. The trading was left almost entirely in the hands of the professionals and the movement of prices was mostly mechanical. In the early dealings the bears made a determined drive against Sugar, Tennessee Coal and Leather, breaking these stocks and causing a gen-eral reaction. The depression was of brief duration except in Chicago Gas, which continued to move downward until 11 a. m., scoring a decline of 1 per cent., with a subsequent rally of % per cent. On the removal of the pressure from the general list there was a recovery in Tennessee Coal of 214: Sugar and Leather preferred, 11/2: o. 1, and the other shares a fraction. Toward midday Tobacco developed marked lost %, and in the subsequent deal-Chicago Gas fell 11/6. Leather preferred, 1%, and Distilling, % per cent.

In the last hour there was a renewal of the attack on Tennessee Coal, which sold down per cent., and New England fell a like amount. The weakness of Tennessee Coal was due to the operations of a newly-formed bear pool, which sold the stock freely and uncovered some stop orders. During the middle of the last century

Baron William Henry von Stiegel came to

Pennsylvania from Manheim on the Rhine,

le was a man of great energy and of scientific and liberal education. From Phila-

elphia, where he married, he drifted into

across the sea. It was planned very much

like its namesake, having a wide square

in the center, with streets running through

it north and south, east and west. Just at this time the Germans were coming to

America in large numbers, and many soon

oined the Baron at Manheim, where he

had already started glass works, prob-ably the first in America. He also built a

'pine plate' square wood stoves. Everything he undertook prospered, and

he soon became very rich for those days. A

burch was the only thing wanting to make

Baron demand and receive the rose. Then

For many years the rose was not

nanded, but within the last decade the

liegel descendants have annually made a

oilgrimage to Manheim, and Rose Sunday

visitors from far and near. After preach-

ing an excellent sermon, from the text,

WHEAT FLUCTUATED

AFTER A DECLINE OF 1 1-2C SEP-TEMBER CLOSED 1 3-SC HIGHER.

Reports and Big Visible Decrease-Provisions Lower

CHICAGO, July 15 .- Wheat, after a break of 14c on vigorous short selling, took courage from the bad crop reports and a liberal visible decrease to-day and closed at an advance of 1%c for September. September corn closed %c lower. September oats unchanged and provisions show slight losses. The morning papers gave prominence to some reports of damage to spring wheat. That started the price up from 661/2c at the close on Saturday to 67@67%c at the opening this morning. The higher of those quotations was realized for only two or three fives, but a good deal changed hands between the prices of 67@67%c. In half an hour from the start the price had declined to 65%c and not until the visible supply statement was published, showing a decrease of 2.122,000 bu for the week, did the price show much capability of recuperation. Even then it only recovered about %c before it was again smothered with more short wheat. A general disbelief in serious damage to the spring wheat crop was the governing feature of the news that incited the selling. The reports from the winter wheat country continue to be of the same very disheartening character as has been characterizing them for such a length of time. Toledo letters say they do not expect to get any wheat there this year from Indiana, and will have to depend on Illinois and Ohio for supplies. The reports from the two latter States do not furnish the hope of much wheat being procurable there either. The foreign markets were all quoted lower at the opening, and the closing cable-grams were of a similar character. Liverpool declined 1½d, Paris 15 centimes to 20 centimes and Berlin ¾ mark. The visible supply now amounts to 41,237,000 bu, compared with 53,154,000 bu a year ago, and 59,-325,000 bu at the corresponding period in 1893. The world's shipments are falling off. They are estimated at about 8,500,000 bu for last week. They have been running at from 9,000,000 to 11,000,000 bu for about three months previous. Should the Russian and Argentine shipments keep dropping off proportionately for a few weeks, Europe will have to bid openly for American wheat in-stead of having 2,000,000 bu thrust upon changed. Pork—Standard mess, \$11.371/2. their unwilling hands weekly, as it is now being made to appear. After the early decline to 65% there was a recovery to 66%c, and several times after that it fell and rose between 651/2c and 66c. In the latter half of the session some reports from the North-west were received which convinced the crowd of more serious damage to spring wheat than the Minneapolis people were willing to admit. Cudany's brokers, who had been persistent sellers at anything over 66c, found more buyers late in the day than they could supply, and when their stock of short wheat was exhausted the price of September shot up rapidly from around 6512c to 6814c, and closed at 677sc. A trade in May wheat was made at 721/2c. With the exception of quite neavy selling

by Schwartz-Dupee the oats market was almost entirely without features. The aforementioned firm disposed of about 400,000 bushels of May. The time of the market was about steady. At the opening a slightly firmer feeling was no iceable. Later on a decline followed and prices closed about steady. September started at 234c, sold to 234c, back to 23c and ended at 234c. ber and May are now the favorites with short sellers. Several times to-day it was almost impossible to trade in September without discounting the nominal market price from 1/4c to 3/5c per bushel. The brilliant prospects for new corn was the governing factor. Receipts were 190 cars and with-drawals from store 455,000 bushels, Argen-tine exported 728,000 bushels of corn last week. Estimated receipts for Chicago to-morrow are 250 cars. The visible decreased 941,000 bushels and now amounts to 6,882,000 bushels, against 2,982,000 bushels a year ago. The market was strong near the opening The market was strong near the opening, September selling at from 464c up to 46%c. It declined to 45c, but firmed up in sympathy with wheat near the close and rested at 45%c. May declined %c.

Provisions were dull and easy, but no radically weak until near the c'ose, when a drive was made at the markets by short sellers. Frank Carpenter's Last Chance. Washington Post.

Frank Carpenter, the newspaper correspondent and writer, has been around the world twice, as everybody knows, and now he is sighing for fresh fields to conquer. "Is there any part of the world which is yet so much of a terra incognita," he was asked the other day, "as to make it worth a visit in the hope of novel experiences?"
"Oh, yes," he said. "But as a matter of fact, a man with an observing eye and a faculty for description need not go into the out-of-the-way places. There is much to be seen and written about even in the wellworn paths. "But that reminds me," continued Car-

enter, "that I had an awful disappointment not long ago. It seems that up in Boston the sympathizers with the oppressed Armenians raised \$1,500 for the purpose of sending some one to Armenia to investi-gate the real condition of affairs there and reporting upon them. They were kind enough to select me as their agent, and I was telegraphed to know if I would accept the mission. Well, I was all tied up with my lecture engagements, and I had to wire my declination. Wasn't that too bad? If I only could have gone what a series of stories I could have written, and I would have made myself as famous as George
